----------	---------------------------	----------

A simple memorization tool, written in **python**, similar to physical flash card quizzing.

**Flashcards is under active development.**

It has recently been revived (5/5/12)

Here is the old version: <https://launchpad.net/pyflashcards>

The older version was written messily, with manual SQL expressions.

This one will be a lot cleaner, and will depend on SQLAlchemy (0.7.7)
